6	**ELECTRICITY TRADING SERVICE**						
	Electricity shall be supplied under these tariffs by contract made or implied, and, with the exemption of approved charges in tenancy, such contract shall be subject to the provisions of section 5 of the Additional Electricity Supply By-Law. If the applicant for an electricity supply is not the owner of the relevant premises, no such supply shall be given by the Council unless, and until such time as the permission of the owner of the premises, or his appointed agent, is given to Council in writing. In such an event the owner ceases to be a consumer in respect of such premises and he will upon again becoming a consumer of such premises have to pay the electricity deposit prescribed in paragraph 6.10.						
6.1.5	**BASIC CHARGES**						
6.1.5.1	Conventional Metering						
	The fixed basic (service) charges shall be payable at the rate indicated from every month, or portion thereof, following the date upon which the consumer has applied for the services to be connected or upon which the Council is ready to effect such connection to the supply mains, whichever may be the later, irrespective of whether the supply of electricity is used or not.						
6.1.5.2	Prepaid Metering						
	Prepaid meters will have a fixed daily rate.						
6.1.6	**HOLIDAY HOUSE**						
6.1.6.1	A single residential property at which electricity (kWh) has not been purchased for three consecutive months is classified as a "Holiday Home".						
6.1.6.2	In order to change the name of the consumer as well as the tariff codes etc. an administration fee will be charged whenever a holiday house becomes permanently occupied.						
6.1.6.3	The responsibility to prove that a house is/was physically permanently occupied, will be on the onus of the applicant.						
6.1.6.4	The same tariff as Domestic Prepaid Electricity Meter is applicable where a Daily Rate is charged. If the criteria is met, application can be made on a yearly basis for an electrical consumption assessment in order to qualify for the All Inclusive Energy Charge.						
6.2	**SUPPLY RATING**						
6.2.1	**ALTERATION OF SUPPLY RATING**						
	In respect of tariffs 1, 2, 3, 4 and 5 one (1) month's written notice shall be given if a consumer wishes to alter the rating of the Council's circuit breaker installed under these tariffs, except that a reduction in size will only be permitted in respect of tariffs 1 and 2 within **6 months of a previous change in the circuit breaker size.** The following fees are payable in advance and must accompany the written notice for a change in circuit breaker size :-

6.5	**SMALL SCALE EMBEDDED GENERATION (SSEG)**						
(i)	SSEG refers in this instance to consumers who wish to fit a Solar generation plant (PV plant) to supplement their energy consumption by harvesting solar energy for their own use. These systems are generally Grid Tied to the municipal network allowing the consumer to draw energy (electricity kWh or Units) from the municipal network when their PV plant does not produce enough energy for their use. In the opposite case where the PV plant is producing more energy than the consumer is using this excess energy is fed back to the municipal network and the consumer receives some credit for this energy they supply to the municipality.						
(ii)	All consumers who wish to have a Grid Tied Solar plant must make ap[plication to the municipality via the Electrical Engineering Department, and this must comply with the municipal regulations as published. The applicant will be required to sign a contract with the municipality to ensure all conditins are met.						
(iii)	The consumer will have to change to a Time of Use (TOU) tariff and will be required to fit a "4-Quadrant" electricity meter with a modum to the municipalities specification for the municipality to read the meter remotely.						
(iv)	The consumer must remain a net consumer of energy in the year as no cash will be paid to the consumer.						
(v)	All installation work is to compy with SANS10142-1 Rev2, and any new regulation that may be published, and a copy of a valid Certificate of Compliance must be issued to the Electrical Engineering Department.

6.6.1	**TARIFF 7[A] : BULK SUPPLY - CONVENTIONAL**						
(a)	**Conditions of Supply**						
(i)	Minimum Notified Maximum Demand shall be 66 kVA						
(ii)	The supply of electricity to consumers metered in terms of this tariff scale shall be at MV (Medium Voltage) or LV (Low Voltage) connection and at the discretion of the Manager Electrotechnical.						
(iii)	This tariff shall be applicable to any service where the consumer contracts in writing to take supply or pay the minimum charges for an initial period of at least two (2) years after which the contract may be terminated subject to six (6) months written notice of termination by the consumer.						
(iv)	On making application for a supply under this tariff the consumer's notified maximum demand shall not be exceeded by more than 25% without at least three (3) months notice having been given in writing to the Manager Electrotechnical. On expiry of such period of notice, or immediately if such increase has occurred without notification, the increased figure shall become the notified maximum demand for the purposes of this tariff.

6	**ELECTRICITY TRADING SERVICE**						
(v)	The maximum demand charge shall be payable at the rate indicated for every month or portion thereof following the date upon which the consumer has applied for the service to be connected or upon which the Council is ready to effect such connection to the supply mains, whichever may be the later, irrespective of whether the supply of electricity is used or not. The said charge shall continue to be payable until the expiry of the period of notice required to be given and shall be based upon the notified maximum demand or the maximum demand of the installation. Such maximum demand shall be the maximum load of that installation sustained or averaged for any 30 minute period during any month. If so required by the Manager Electrotechnical, the maximum current in amperes sustained or averaged for any such 30 minute period in the heaviest load phase at the declared voltage of supply. Any demand meter, time switch or other apparatus necessary for the determination of the maximum demand shall be deemed to be a meter in terms of the Standard By-Law.						
6.6.2	**VACANT ERVEN - BULK Supply to Developments**						
(a)	This fee shall apply to vacant erven only. In the case of developments taking the electricity supply at bulk, the availability fee payable in respect of vacant erven shall be waived, however the Network Access charge shall be payable on the Notified Demand or the highest recorded maximum demand for the month in question, whichever is the greatest.						
6.6.3	**CLOSED HOUSING DEVELOPMENTS - RESIDENTIAL BULK SUPPLY TO CLOSED HOUSING DEVELOPMENTS**						
(a)	Closed Housing Developments that are metered by means of a Bulk meter can annually apply in writing for the Residential Bulk Low Voltage Tariff. This tariff is only for resellers of electricity to housing developments, sectional title schemes and blocks of flats. This tariff also **does not** allow for **Time of Use.** Eligibility for the new tariff will be determined by the Director of Finance and will be at his discretion. Application must be made one (1) month before the new financial year (01 June).

	The Time of Use (TOU) tariff will only be available for residential developments on a Commercial Bulk Supply after 60% of the erven in the development have houses build on the erven and occupation of the houses have been taken. The TOU tariff is not applicable to the new Residential Bulk Supply tariff (6.3.13.11)						
iii)	Once a consumer has changed to the TOU tariff, a minimum stay period of 12 months is required. Once the 12 months have elapsed, application can be made to change back to the Maximum Demand Tariff. A 3 Month termination notice must be given.						
iv)	Consumers must have the necessary electronic metering equipment installed and correctly programmed for the TOU at their cost.						
v)	Where existing Consumers consider conversion to TOU, it will be the Consumers' responsibility to do a tariff study.						
vi)	The Reactive Energy Charge is applied to kVArh in excess of 30% (0,96 Power Factor) of kWh recorded during peak and standard periods. The excess reactive energy is determined per 30 minute integrating period and accumulated for the month and will only be applicable during high-demand season.
