1. REQUIREMENTS

The Knysna Municipality requires the services of an appropriately qualified professional to develop an Environmental Strategy.

2. BACKGROUND INFORMATION

Knysna is situated within a unique and beautiful natural environment that underpins the economy while delivering a suite of ecosystem goods and services to the greater Knysna area. The premise of the need for an environmental strategy is based upon the conflict between development, perceived and entrenched landowner rights, conservation requirements and the need for economic growth. As such, the town faces a number of environmental challenges:

1. Rapid urbanisation and urban growth including the expansion of the urban footprint as the demand for housing increases;
2. Limited and increasingly scarce resources in terms of energy, water and the capacity to manage solid and liquid waste;
3. Pollution of the estuary and freshwater systems;
4. Increased exposure to the risks associated with climate change such as fire, drought, floods and erosion;
5. A unique sense of place and cultural heritage that requires protection in a rapidly changing town;
6. Socio-economic challenges of high levels of unemployment, poverty, inequality, crime and social injustice that negatively impact on the natural environment.

3. OBJECTIVES

The service provider will draft a comprehensive Environmental Strategy to address the challenges outlined above. An appropriate strategy is essential for long term planning and the optimization of limited resources. It will provide the necessary structure and framework to allow for strategic environmental decision-making as opposed to ad-hoc, reactive management. The Environmental Strategy will inform budgeting, project development and implementation and will provide a roadmap for the systematic improvement of environmental management by Knysna Municipality. The strategy will be relevant for a local authority and will portray an unambiguous stance on environmental issues for communication to employees, customers and those it wishes to do business with (developers, investors, and the global community).

4. SCOPE OF WORK

The following deliverables are required:

1. Identify 5 of the most important threats to Knysna’s natural environment.
2. Identify key interventions for each threat including recommended timelines and estimated budget requirements.

In order to contextualize the threats the following will be necessary:
3. Conduct a literature review of relevant academic research, fine and broad scale environmental management plans, frameworks, strategies and policies that address long term environmental management in Knysna. These can include district and regional plans of which Knysna is a part.

4. Using the Sensitive Geographical Areas identified in the Garden Route Environmental Framework (topography, ecology, aesthetics), identify, at a cadastral level, the sites within the Greater Municipal area that are environmentally significant.

5. Describe the threats to these areas of significance and outline a strategy for addressing each threat. The strategy should include a timeline and estimated human and financial resources required to adequately address the threat in the short (now), medium (next 5 years) and long term (5 - 10 years).

6. Using the Sensitive Geographical Areas identified in the Garden Route Environmental Framework, identify opportunities and make clear recommendations on how the opportunities can be implemented. Include a timeline and estimated human and financial resources.

5. EVALUATION

All bids will be evaluated by a panel on basis of functionality (100%) and Price 80. The points scored for functionality will not be carried over to price, but will only be used as a gate keeping exercise. The final evaluation will be done in terms of the Council’s Preferential Procurement Policy which states 80 for price and the remaining 20 for B-BBEE.

5.1 FUNCTIONALITY:

Regarding functionality, the following criteria will be applicable and the maximum weighting of each criterion is indicated in brackets:
