Be Knys. Save Water.

Knysna is experiencing ongoing water pressure. Simple choices made by every guest help ensure there is enough water for everyone. **Together, we can avoid Day Zero.**

1. TAKE SHORT, STOP-START SHOWERS

Keep showers to 2–3 minutes. Turn the water off while soaping and shampooing.

2. ONLY FLUSH WHEN NECESSARY

If it's yellow, let it mellow. Choose the small flush. Every flush uses valuable drinking water.

3. REUSE TOWELS & LINEN

Hang up towels and reuse them. Fresh linen only when needed saves huge volumes of water.

4. REPORT LEAKS IMMEDIATELY

A dripping tap or running toilet can waste hundreds of litres per day.

5. TURN OFF TAPS WHILE BRUSHING & SHAVING

A running tap can waste 6–9 litres per minute. Use a cup instead.

6. DRINK, DON'T WASTE

Only pour what you'll drink. Refill bottles and glasses instead of discarding unfinished water.
